SUMMARY REPORT FOR AERIAL PHOTOGRAPH ANOMALY (APHO) 35, MARINE CORPS AIR STATION (MCAS) EL TORO

Dear Mr. Gould:

The Department of Toxic Substances Control (DTSC) has reviewed the above report dated August 31, 1999. The Report presents the results of the record search activities and a visual inspection of APHO 35 (Also known as Science Applications International Corporation (SAIC) 238). The anomaly is described as "an open storage area on the north and east sides of Building 137" at MCAS El Toro. APHO 35 was identified on an aerial photograph taken in 1973.

The report recommends a no further action status for APHO 35 based on evaluation of historical aerial photographs, Station maps and plans, Station property records, environmental program management plans, the results of previous environmental restoration program investigations, and a visual site inspection conducted in August 1999.

Based on our review of the documentation presented, DTSC concurs with the proposed no further action status designation for APHO 35. The no further action status can be documented in the next BRAC Cleanup Plan update. If you have any questions, please contact me at (714) 484-5429.

Sincerely,

Alice Gimeno
