Santa Ana, CA 92703

Dear Ms. Modanlou:

Subj: DEMONSTATION OF TCE OXIDATION USING POTASSIUM PERMANGANATE
INSTALLATION RESTORATION PROGRAM (IRP) SITE 24, MARINE CORPS AIR
STATION, EI TORO

Provided as Enclosure (1) is the strategy document for the demonstration project for groundwater remediation. We have tentatively scheduled field activities to begin during January or February 2000.

The demonstration project will involve the oxidation of trichloroethene (TCE) in groundwater using an aqueous solution of potassium permanganate. Groundwater will be extracted from the shallow aquifer, mixed with potassium permanganate solution, and reinjected into the shallow aquifer. One extraction well and five observation wells will be constructed in the vicinity of Installation Restoration Program (IRP) Site 9, Crash Crew Pit Number 1, in the southwestern section of the Station.

If you have questions pertaining to the work at IRP Site 24, please do not hesitate to call myself at (619) 532-4155, or Ms. Lynn Hornecker at (619) 532-4162.

Sincerely,

A handwritten signature in cursive script that reads "Dean Gould".
