Mr. Roy Herndon  
Orange County Water District  
P.O. Box 8300  
Fountain Valley, CA 92728-8300

SUBJECT: COORDINATION OF IRVINE DESALTER WELL CONSTRUCTION  
ACTIVITIES

Dear Mr. Herndon:

In response to your letter of 6 August 1992, the Orange County Water District's primary point of contact is Lieutenant Commander Larry Serafini.

We do have several comments on your well construction plans. They are enclosed.

There is no benchmark or physical control point marking the flight clear zone. The well site locations that you enclosed in your letter have been approved. We will assist your surveyor in locating IDP-1 in the correct general location if he needs our assistance.

Ms. Arnett's records do not indicate that the Southern California Edison easement was ever completed. Southwest Division is double checking to see what their records indicate.

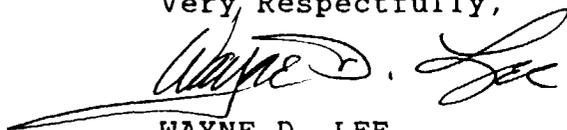

To date Ms. Arnett has not received a copy of the County of Orange's 1944 easement. Please forward her a copy of the legal description so that we can settle this issue.

We have received concurrence from the other members of our Federal Facility Agreement to dispose the nonhazardous drill cuttings in our soil disposal area for the Remedial Investigation. This area is located east of the golf course along Perimeter Road.

Since you last talked to Andy Piszkin, there have been changes in the cost analysis for the Irvine Desalter. The last numbers that we heard were in line with your quotes from last November. You will be receiving a copy of the Final Cost Analysis Report due in September.

If you have any further questions, contact Larry at extension 726-4432.

Very Respectfully,

A handwritten signature in black ink, appearing to read "Wayne D. Lee", with a long horizontal flourish extending to the left.

WAYNE D. LEE  
Deputy Director  
Environmental Department
