Long Beach, CA 90802

Subject: Response to DTSC Review Questions
Final Investigation-Derived Waste Management Plan for Phase II RI/FS,
MCAS El Toro, California
CTO-0059

Dear Mr. Jimenez:

Your fax dated 8/8/95 asked two questions regarding the Final Investigation Derived Waste Management Plan. Your questions and our responses are as follows:

- 1) Will soil exceeding 100 mg/kg be considered hazardous?

Response: Soil exceeding 100 mg/kg will be considered to be petroleum hydrocarbon-contaminated soil.

- 2) Where will the waste tracking records be kept?

Response: Records are kept at the Environmental Restoration Facility at MCAS, El Toro.

Feel free to contact me at (619) 687-8802 regarding our responses to your questions or if you need any additional information.

Sincerely

David Cowser
Project Manager
