Description of Discussion/Action Items:

History:

During a meeting of the MCAS El Toro BCT in April 1995, D. Liu of Bechtel indicated that there was interest on the part of J. Christopher of CAL-EPA to reexamine the issues associated with the use of PRGs as part of field screening decision-making. D. Liu noted that J. Christopher had suggested that PRGs be divided by a factor of 100 for carcinogens and 10 for noncarcinogens. This suggestion presents several complications which would require further study. Thus, the conference call described herein was scheduled. Key participants (at a minimum) for the conference call were identified as J. Christopher of CAL-EPA and D. Liu of Bechtel.

Current Status:

D. Tedaldi initiated a conference call on 15 May 1995 at 1000 hrs. The details of the conference call were forwarded to invitees on 10 May 1995 via FAX. D. Liu, W. Myers, and J. Jimenez of DTSC participated. The attendees could not conduct the meeting because J. Christopher was ill and could not attend.

J. Jimenez suggested that the meeting be rescheduled for a later date when all key parties could attend a face-to-face meeting.
