Dear Ms. Diamond:

Marine Corps Air Station (MCAS), El Toro is listed as a closing base and therefore, as our mission states, is on a fast-track remediation process expediting reuse of the land while protecting human health and the environment. Your efforts in fulfilling this goal and supporting the entire team by rapidly reviewing the Site 13 Engineering Evaluation/Cost Analysis (EE/CA) and providing comments have saved time and money.

I would like to personally thank you and your agency for making the review of the Site 13 EE/CA a priority. The Navy had anticipated a later submittal date, however, when the document was submitted early, you willingly reorganized your schedule to support the review. You ensured that your review was completed.

The restoration and reuse of MCAS El Toro is a very dynamic project that requires proactivity and flexibility from all team members. The time and money saved has benefitted the process of returning MCAS El Toro to the community. Thanks again and keep up the good teamwork!

Sincerely,

A handwritten signature in black ink, appearing to read "Dana Sakamoto".

DANA SAKAMOTO
Director, BRAC Division
By direction of
the Commanding Officer
