COMMENTS ON DRAFT WORK PLAN FOR SITE VERIFICATION ACTIVITIES AT FORMER MSC JP5 STATION 574 SITE AND JP5 PIPELINE, FORMER MARINE CORPS AIR STATION, EL TORO

Dear Mr. Piszkin:

We have reviewed the above referenced document, dated July 28, 2004, which we received on August 13, 2004.

The work plan proposes nine soil borings and 18 soil samples to be collected from 7 feet below ground surface (bgs) and 20 feet bgs at the MSC JP-5 Station 574 Site. For the former JP-5 pipeline segments, the plan proposes 15 soil borings and 30 soil samples to be collected from 10 feet bgs and 20 feet bgs at identified locations. Soil samples will be analyzed for total petroleum hydrocarbons, gasoline and diesel range and volatile organic compounds by standard EPA methods.

We have no comments on and concur with the work plan. For any questions, please call me at (951) 782-4494, or send email to jbroderic@rb8.swrcb.ca.gov.

Sincerely,

John Broderick
SLIC/DoD Section
