COMMENTS ON MEMORANDUM, PROPOSED SAMPLING LOCATIONS ALONG FORMER JET FUEL PIPELINE (MSC JP5), FORMER MARINE CORPS AIR STATION, EL TORO

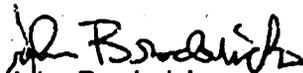

Dear Mr. Piszkin:

We have reviewed the above referenced document, dated February 17, 2004, which we received on February 20, 2004. We have the following comments:

- **Proposed Boring JP5B5:** The proposed location for this boring is adjacent to a dry well within a former truck refueling area. Dry wells were constructed and used for disposal of liquid wastes. The boring must be completed to a depth of at least 15 feet below the original total depth of the dry well. Sampling depths from proposed Boring JP5B5 should be taken from above, at, and below the dry well's original total depth. The dry well should be investigated for residual liquids, especially if it has been back filled with soil or gravel.

For any questions, please call me at (909) 782-4494, or send email to jbroderic@rb8.swrcb.ca.gov.

Sincerely,

John Broderick
