SUMMARY REPORT FOR AERIAL PHOTOGRAPH ANOMALY (APHO) 17, MARINE CORPS AIR STATION (MCAS) EI TORO

Dear Mr. Gould:

The Department of Toxic Substances Control (DTSC) has reviewed the above report dated July 9, 1999 and the Addendum inspection checklist dated July 20, 1999. The Report presents the results of the record search activities and a visual inspection of the APHO 17 (Also known as Science Applications International Corporation (SAIC) 139). The anomaly is described as stains in the vicinity of Building 325, between S 14th Street and R Street within the boundary of IRP Site 24. APHO 17 was identified on an aerial photograph dated 1964, and the surface area of the anomaly is approximately 350 feet long by 250 feet wide.

The report recommends a no further action status for APHO 17 based on evaluation of historical aerial photographs, Station maps and plans, Station property records, environmental program management plans, the results of previous environmental restoration program investigations, and visual site inspections conducted in June and July 1999.

DTSC concurs with the proposed no further action status designation for the APHO 17. The no further action status can be documented in the next BRAC Cleanup Plan updated. If you have any questions, please contact me at (714) 484-5418.

Sincerely,

Tayseer Mahmoud
