Dear Regulatory Team Members:

Enclosed please find the *Final Basewide Dust Control Plan, Hunters Point Shipyard, San Francisco, California, June 2009*. This Dust Control Plan is part of the work plan for Dust Control Plan has been developed in coordination with the Hunters Point Shipyard regulatory community. The Dust Control Plan is both a continuation of previous dust control efforts, along with improved dust control measures due to the special nature of recent environmental remediation work being conducted at Hunters Point Shipyard. Current field work under this Dust Control Plan is being undertaken as part of the Navy's contracts for sewer and storm drain activities and radiological screening yard activities. However, the Dust Control Plan's activities and provisions are to be applied and integrated into basewide activities by the Navy and it's contractors at other Hunters Point work sites based on the nature of earth disturbing activities.

As this plan was developed in coordination with the Hunters Point Shipyard regulatory community through site visits and inspections of dust control measures, working meetings, and informal review and comment periods, the Navy considers this document Final. If you have further questions regarding the Hunters Point Shipyard dust control program please contact Mr. Dane Jensen at (619) 532-0789, or Mr. Keith Forman at (619) 532-0913.

Sincerely,

KEITH FORMAN
BRAC Environmental Coordinator
By direction of the Director
