			Jobsite <u>    </u>		
			Other <u>    </u>		
Company: CAL-EPA DTSC		Contact Name & Title Allen Winans	Bechtel Name & Title Ed Morelan, CTOL Dan McNary, Tech Lead		
Purpose of Contact: Allen was contacted to discuss the proposed contingent sampling plan for IR Sites 1 through 5 and 6a.					
<p>Results: Allen concurred with the contingent plan with the following comments:</p> <p>1) He was concerned with the lack of soil samples in the southern area of the Site 1 and 2 geophysical investigation which will result in the lack of extent definition. He requested additional sampling.</p> <p>2) He wanted a shallow Hydropunch moved to a location due north of MW-6 on Site 3 to account for the inward increasing chemical gradient of vinyl chloride.</p> <p>3) He was concerned with the elevated concentrations of metals in surface sample SS-3-15 and requested additional sampling.</p> <p>As a result of this conversation, the following were added to the contingency plan:</p> <p>1) Two soil borings in the southern area of the Site 1 and 2 geophysical investigation and 3 contingent soil borings for lateral extent definition of vados zone soils.</p> <p>2) A Hydropunch sample was moved from the northwest to due north of MW-3.</p> <p>3) Two additional surface soil samples were included and one soil boring was added both in the area of SS-3-15. All of these samples are to be analyzed for TAL Metals to establish lateral and vertical extent of metals in the vadose zone soils.</p>
