

**TECHNICAL WORKSHOP**  
IRP Site 7 - Long Beach Harbor, West Basin  
7 May 1996

**AGENDA**

*The purpose of tonight's meeting is to present information in response to the comments that were received on the draft RI for Site 7. We reviewed the written comments from Don May, David Sundstrom, Richard Landgraff and Karl Tiedemann and have attempted to put a presentation together that will answer the concerns presented in these comments. The specific draft responses to comments will be provided to you tonight before you leave so that you may review each comment and response in detail. We hope that this meeting will resolve all the concerns of the RAB so that we can proceed with expediting the Installation Restoration cleanup program and closure of the Naval Complex.*
