**FINAL SITE INSPECTION (SI) REPORT FOR AREA OF POTENTIAL  
CONCERN 5 (SITE 14) AT THE NAVAL STATION LONG BEACH,  
LONG BEACH, CALIFORNIA**

Dear Mr. Rollefson:

The California Department of Toxic Substances Control (DTSC) has completed its review of the *Final SI Report for Area of Potential Concern 5 (Site 14) at the Naval Station Long Beach, Long Beach, California*, dated June 1997. The *Final SI* was prepared by Bechtel National, Inc.

The *Final SI* report indicates that further investigation is recommended at Site 14 to determine the vertical and lateral extent of perchloroethylene (PCE) in groundwater, and the horizontal extent of PCE in soil. DTSC and the Regional Quality Control Board - Los Angeles agree with the recommendations made in Section 7.6 of the *Final SI* report.

Furthermore, DTSC and the Regional Water Quality Control Board - Los Angeles are satisfied with incorporation of comments in the *Final SI* report. As a result, the Department hereby concurs with this *Final SI* report.

If you have any questions, please contact Alvaro Gutierrez at (562) 590-5565.

Sincerely,

John E. Scandura, Chief  
Southern California Operations  
Office of Military Facilities
