**DRAFT FEASIBILITY STUDY FOR INSTALLATION RESTORATION SITES 3,4,5  
AND 6A AT THE FORMER NAVAL STATION LONG BEACH CALIFORNIA (File No.  
90-76)**

We have received the Draft Feasibility Study for IR Sites 3,4,5 and 6A at the Former Naval Station Long Beach, dated November 24, 1997. We concur with the Navy's recommendations for the above referenced sites. However, the document should indicate that, should the existing groundwater monitoring program indicate that dissolved concentrations are either increasing, or are present in concentrations exceeding California Ocean Plan standards, further action will be required.

If you have any questions or comments regarding the above, please contact Hugh Marley at (213) 266-7669.
