**WELL INSTALLATION AND GROUNDWATER MONITORING REPORT, FOURTH
QUARTER 1997, FOR BUILDING 4 AT NAVAL STATION LONG BEACH, CALIFORNIA
(FILE NO. 90-76)**

We have received and reviewed the Well Installation and Groundwater Monitoring Report, Fourth Quarter 1997, for Building 4, dated February 19, 1998. The report details the installation of microwell MW-4, in the downgradient direction of the dissolved-phase diesel plume present at the Building 4 site. The microwell satisfactorily addresses the groundwater monitoring data gaps identified in our November 13, 1997 letter to the Navy. You also have approval to treat and dispose of the well purge water collected from Building 4, through the existing groundwater treatment system, at the NEX Gas Station, as requested.

If you have any questions or comments regarding the above, please contact Hugh Marley at (213) 266-7669.
