1. Enclosures (1) through (4) are provided for your information and as agreed per reference (a), for the recent US EPA data call of military activities that have not supplied PA's and SI's for Hazard Ranking Scoring. We received a phone call from Carolyn Douglas stating that no more data was required for the US EPA data call from Naval Station Long Beach, Long Beach Naval Shipyard, or Defense Fuel Support Point, San Pedro for ranking purposes. In reference (b), it was requested that US EPA provide letter to Naval Station Long Beach stating no more documents are required for the Hazard Ranking Scoring. As part of the BRAC Cleanup Team, you will be forwarded copies of all future work plans for Installation Restoration Program (IRP) at the Long Beach Naval Complex. Do you wish copies of all IRP documents for the Defense Fuel Support Point to be sent to you also? If not, is there someone else at US EPA that should receive future documents?

2. The Naval Station point of contact for this matter is Duane Rollefson at DSN 360-7086, commercial (310) 547-7086.
