FINAL REMEDIAL INVESTIGATION (RI) REPORT FOR INSTALLATION RESTORATION PROGRAM SITES 8 THROUGH 13, LONG BEACH NAVAL SHIPYARD, LONG BEACH, CALIFORNIA

Dear Mr. Baer:

The Department of Toxic Substances Control (DTSC) has completed its review of the *Final Remedial Investigation (RI) Report for Installation Restoration Program Sites 8 through 13 at Long Beach Naval Shipyard, Long Beach, California*, dated June 1997. The Final RI was prepared by Bechtel National, Inc.

The *Final RI* report addresses Operable Units (OU) 4 and 5 at the Long Beach Naval Shipyard. DTSC and the Regional Water Quality Control Board - Los Angeles are satisfied with the responses and incorporation of comments in the *Final RI* report. Based on the recommendation made in the *Final RI* report, additional groundwater investigation is to be conducted at sites 9, 12 and 13. This additional groundwater investigation will be submitted as an amendment to the *Final RI* report. Therefore, the California Environmental Protection Agency will not concur with the *Final RI* report until the additional groundwater data is in final form.

If you have any questions, please contact me at (562) 590-5565.

Sincerely,

Alvaro Gutierrez
Hazardous Substance Engineer
