SUBJECT: Comments on the *Final Petroleum Corrective Action Plan, Defense Reutilization and Marketing Office Site and Vicinity*, dated August 3, 2009, Former Mare Island Naval Shipyard, Vallejo, California

Dear Mr. Bloom:

Thank you for providing the Water Board with the *Final Petroleum Corrective Action Plan, Defense Reutilization and Marketing Office Site and Vicinity*, dated August 3, 2009. Water Board staff has reviewed the above-reference document and have no additional comments.

The Water Board concurs with the Petroleum Corrective Action Plan (PCAP) pending the Navy's submission of change pages for the Final PCAP. The change pages will document that the Navy has consented to an overburden stockpile sampling frequency of one sample per 500 cubic yards, and overburden stockpile samples will be analyzed for volatile organic compounds (VOCs) in addition to the constituents presented in the PCAP. Stockpile samples may be collected as four-point composite samples; however, discrete samples must be collected for analysis of volatile organic compounds and total petroleum hydrocarbons as gasoline.

Please contact me at (510) 622-2756 or [pjorgensen@waterboards.ca.gov](mailto:pjorgensen@waterboards.ca.gov) if you have any questions.

Sincerely,

Paisha Jorgensen, PG  
Engineering Geologist

Mr. Bloom  
Former Mare Island Navel Shipyard
