

Vallejo police arrest 4 people 'prostitution sting'

Times-Herald staff report

Vallejo police arrested four people during a Friday undercover "prostitution sting," police said in a release Monday.

An undercover Vallejo police officer patrolled the downtown area, including Marin, Florida and Carolina streets, for three hours starting at 7 p.m. during the sting, the release said.

Jaime Schooler, 21; Barshae Alonzo, 29; Jacinta Tyler-Wilson, 23, all of Vallejo and Erica Cisneros, 23, of Richmond, were arrested on suspicion of solicitation for prostitution, it said.

The police department's Patrol and Major Crimes divisions worked with the Solano County Sheriff's office on the sting, the release added.

Vallejo Police Sgt. Jeff Bassett said that since mid-January at least 13 people were arrested in Vallejo for prostitution-related offenses, including one john.

A john sting operation is "more difficult and dangerous" to carry out, Bassett said.

"It takes more resources, and it's more difficult to play a part of a convincing prostitute than a john," he added.

NOTICE OF AVAILABILITY AND PUBLIC COMMENT PERIOD MUNITIONS NON-TIME-CRITICAL REMOVAL ACTION PRODUCTION MANUFACTURING AREA AND SOUTH SHORE AREA FORMER MARE ISLAND NAVAL SHIPYARD, VALLEJO, CALIFORNIA

The Department of the Navy, in coordination with state and federal environmental regulatory agencies, is announcing the public availability of the Engineering Evaluation Cost Analysis (EECA)/Interim Remedial Action Plan (IRAP) for the Munitions Non-Time-Critical Removal Action at the Production Manufacturing Area (PMA) and South Shore Area (SSA) located on the Former Mare Island Naval Shipyard (MINS) in Vallejo, California. Former MINS is located 25 miles northeast of San Francisco. The PMA and SSA are located at the southern end of former MINS. The sites were formerly used to manufacture and store munitions and munitions constituents. Previous munitions removals have been conducted at the sites since base closure in 1996. Possible remaining munitions and munitions constituents at the sites may pose a threat to human health and the environment. Surveys have been performed to detect metallic objects in the subsurface, which could represent potential munitions. The areas where the survey identified subsurface metal are called anomalies. The EECA/IRAP recommends excavation and removal of the anomalies in the areas most likely to contain potential munitions.

PUBLIC COMMENT PERIOD

The EECA/IRAP is available for public review, and the Navy will accept comments during the 30-day public comment period held from March 7, 2011 through April 4, 2011. Public comments submitted in writing must be postmarked or e-mailed no later than April 4, 2011. Please send all comments to the Navy Base Realignment and Closure, Environmental Coordinator, Ms. Janet Lear, 1455 Frazee Road, Suite 900, San Diego, California 92108-4310, (619) 532-0976, (619) 532-0780 (fax), or janet.lear@navy.mil.
