California Regional Water Quality Control Board
San Francisco Bay Region
1111 Jackson Street, Room 6040
Oakland, CA 94607

Attention: Donald D. Dalke

This letter is in response to your request for comments on the "Tentative Waste Discharge Requirements (TWDR)" issued by your Board on April 11, 1985 for Naval Air Station (NAS) Moffett Field, California. We have reviewed the subject document and offer the following comments:

1. The discharger that is referenced by the TWDR should not be this Command. The correct discharger is:

Commanding Officer, Naval Air Station
Moffett Field, CA 94035

2. Specification B-2 (page 4) and Tasks 5a, b, c (pages 6 and 7) were never addressed by your Board at any of the meetings during the development of the work plan for the first stage of the confirmation study to define groundwater pollution at NAS Moffett Field. Nevertheless, we will carry out task 5a by collecting available data on private and public wells within the boundaries of the station. Data will include status of well driller's log, well construction records, water levels, production records, type and quantity of use, and other available information. Tasks 5b and c would be carried out during the next stage of study.

3. Due to the changes in scope of work dictated by your Board, we request that the compliance dates contained in the TWDR be revised as follows:

<u>Tasks 3a and 4a</u>	- November 7, 1985
<u>Tasks 3b and 4b</u>	- December 6, 1985
<u>Tasks 3c and 4c</u>	- December 20, 1986
<u>Tasks 3d and 4d</u>	- July 1, 1986
<u>Tasks 4e</u>	- December 1, 1986
<u>Tasks 5a</u>	- December 6, 1986

4. Provision C-8 (page 7) calls for interim cleanup and containment plans by November 15, 1985. We feel that this is not practicable because such plans should not be developed until most tasks under the first stage are completed. We expect that plans for selected sites could be developed by July 1, 1985.
