Subj: RESULTS OF THIRD QUARTERLY ROUND OF ACTIVE WELLS SAMPLING AT NAVAL AIR STATION, MOFFETT FIELD

We are conducting a Potential Conduits Investigation on Naval Air Station (NAS) Moffett Field. As part of this investigation, the water quality of active wells are being evaluated. Enclosure (1) contains the location map for Active Wells 24D1, 10G1, 10Q and 10Q03 at NAS Moffett Field and the laboratory results for the third quarter sampling. For Quality Assurance/Quality Control, a travel blank, a field blank, and a method (laboratory) blank were analyzed. A duplicate sample from well 10Q was also analyzed.

The third quarter samples were collected on February 24, 1988 and analyzed on March 2, 1988. The samples were analyzed in accordance with U.S. Environmental Protection Agency (EPA) methods 8010 (or 601) and 8020 (or 602) for purgeable halocarbons and purgeable aromatics, respectively.

Should you have any questions regarding this matter, the point of contact is Commander, Western Division, Naval Facilities Engineering Command (Attn: Ms. Chloe Jue, 1146CJ, 415/877-7502).

Sincerely,

ALEX E. DONG
Head, Environmental Restoration Section
