Re: "Superfund" cleanup at Moffett Field NAS

Dear Mr. Cain:

Protection of South San Francisco Bay -- its water quality and wetlands habitat -- is a top conservation priority for the Santa Clara Valley Audubon Society. Accordingly, we are concerned that the groundwater cleanup effort by the Navy for Moffett Field and the adjacent private industries for work in the Middlefield-Ellis-Whisman area be expedited. To accomplish this, we recommend that the interagency agreement be strengthened to:

Speed up the timetables,

Make the definition of cleanup goals more precise and enforceable,

Require coordination between the Navy and Fairchild, Intel and Raytheon, and

Immediately activate the Technical Advisory Committee to assure active and effective public participation.

Thank you for your attention to this request. We will appreciate being informed of the decisions on this matter and of progress in implementing the cleanup.

Sincerely,

Trish Mulvey
