January 30, 1996

Mr. Donald Chuck, Environmental Engineer  
Navy Environmental Office  
P.O. Box 68, Building 107  
Moffett Field, CA 94035

Dear Mr. Chuck:

Thank you for the opportunity to comment on the revised cleanup plan for Operable Unit 1 (OU1) at Moffett Field.

The City of Mountain View continues to be vitally interested in the cleanup efforts currently underway at Moffett Federal Airfield. It is the City's position that OU1 and all contaminated sites at Moffett Federal Airfield be cleaned up to a level that will allow for the maximum flexibility for future land use and meet all health and safety standards.

The City of Mountain View has concerns regarding the Navy's long-term commitment for the cleanup of OU1 and other contaminated sites at Moffett Federal Airfield. The City is interested in knowing the mechanism the Navy will use for the provision of adequate financial resources for the long-term cleanup of OU1 and other contaminated sites at Moffett Federal Airfield.

The City also has concerns regarding the methodology for groundwater sampling contained in the draft field work plan for OU1. Groundwater samples should be taken at every hydropunch. Groundwater sampling should not be limited to areas where only permeable layers exist.

Thank you again for the opportunity to provide comments on the revised cleanup plan for OU1 at Moffett Federal Airfield. I am requesting a response to this correspondence and continuing to be involved in the public participation process for the cleanup of Moffett Federal Airfield.
