**SUBJECT: Concurrence with the Navy's Request for Decreasing in Sampling Frequency at Installation Restoration Site 1, Letter of December 10, 2004, Naval Fuel Depot Point Molate, Richmond, California**

Dear Mr. Bloom:

On December 10, 2004, the San Francisco Bay Regional Water Quality Control Board (Water Board) received your request for decreasing the sampling frequency and modifying the analyte list for Installation Restoration (IR) Site 1.

Water Board staff concurs with changing the sampling frequency at IR Site 1 from quarterly to semiannually. According to groundwater monitoring requirements presented in CCR Title 27, if a significant change in the groundwater quality is noticed in the future, Water Board staff may request a re-evaluation of the sampling frequency. In regards to selecting best times for performing the two sampling events, we recommend that a review of the historical groundwater level and seasonal rainfall information be made in selecting the most appropriate months for the wet and dry season sampling events.

In regards to modifying the analyte list, Water Board staff concurs with the proposed change on condition that those analytes removed from the list will however, be tested for, in the 5-year groundwater sampling event.

Mr. Michael Bloom
