Facilities
Attn: A. Landis, Chief of Operations
8950 Cal Center Drive
Sacramento, CA 95826

Gentlemen:

This document is intended to supplement the Department of the Navy (DoN) Action Memorandum dated 29 December 1993 for a removal action at the Naval Training Center (NTC), San Diego, Inactive Landfill.

The DoN intends to continue the removal action at the NTC Inactive Landfill. Recent landfill gas sampling indicated that "hot spots" upon the landfill are causing gas emissions in excess of the allowable limit of 500 parts per million by volume expressed as methane. As a result, the DoN will perform additional grading of soil and repair surface cracks upon the landfill area. This effort will continue to prevent concentrated release of landfill gas emissions. The effort is expected to reduce the landfill gas emissions to compliant levels pending further evaluation and final remediation or "closure" of the landfill site. Subsequent grading events may occur from time to time as necessary to maintain landfill emissions at compliant levels.

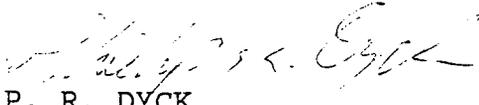

In undertaking the continued grading, the DoN will comply, to the extent practicable, with substantive portions of Federal and State Applicable or Relevant and Appropriate Requirements (ARARs) outlined in the 29 December 1993, NTC Action Memorandum.

The DoN has previously developed a Community Relations Plan (CRP) in accordance with the National Contingency Plan (NCP) § 300.415 (m)(3), which specifies that such a plan be developed for removal actions that extend beyond 120 days. The CRP is available for public review at the Information Repository located in the San Diego City Library, Main Branch, 820 E Street, San Diego, California.
