

**RESPONSES TO RAB COMMENTS ON
DRAFT PRELIMINARY ASSESSMENT REPORT
POINTS OF INTEREST -- GROUP B
Naval Training Center (NTC) San Diego**

R. Cooper's Comments:

1. **COMMENT.** POI 52, page 31. More information is needed as to why "Further Study Recommended" is indicated.

Response: The information gathered for this POI has been reevaluated and the recommendation presented in the draft report has been changed. It is not believed that further action is required for this POI. The new recommendation will be included in the Final Comprehensive POI report scheduled to be submitted around June 1996.

2. **COMMENT.** POI 84, page 37. The reader will have legitimate concern about if the ground at this former paint locker has been tested for lead contamination.

Response: There is no record of a leaded paint release having occurred at this location that would necessitate surface sampling for lead contamination.

3. **COMMENT.** POI 17, page 5. Last sentence in "Previous Process Description" can be improved to: "Specific treatment, construction, and process activities while this site was a hobby shop are unknown."

Response: Comment noted.

4. **COMMENT.** POI 40, page 19. The comma in the first sentence is not necessary.

Response: Comment acknowledged. The correction will be reflected in the summary sheet for this POI in the Final Comprehensive POI report.
