San Diego, CA 92138-5261

Dear Ms. Church:

Enclosed for your review is a final Solid Waste Water Quality Assessment Test (SWAT) Report and Site Inspection Report for the Marine Corps Recruit Depot (MCRD) Disposal Area located at the Naval Training Center San Diego.

This submittal is in accordance with the Department of Defense's Installation Restoration Program and is meant to fulfill the requirements of California Water Code Section 13273 for the SWAT as well as Section 120 of the Comprehensive Environmental Response and Liability Act of 1980 (CERCLA).

As described in the report, activities associated with the investigation included:

1. A geophysical survey to delineate the extent of the disposal area.
2. Installation of seven shallow and four deeper groundwater monitoring wells.
3. Groundwater level study.
4. Soil, surface water, and groundwater sampling and analysis.

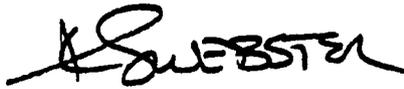

Two sampling events were conducted, both in "wet weather" and "dry weather" conditions. Because low levels of contaminants were consistent in both sampling rounds, we are considering no further study at the site.

We are proposing to grade the site for control of surface water as described in the recommendations section of the report. The land area will continue to be a California Least Tern protected area. Physical disturbance of the subsurface will be avoided.

A workplan was forwarded to your agency for review prior to the start of this investigation. Request you review the enclosed report and provide us comments on our recommendations for further action if you desire. If you would like to comment, please forward comments within thirty days.

For questions, contact either Ms. Martha Gandy, Naval Training Center, Environmental Engineer, or Mr. Michael Pound, Southwest Division Naval Facilities Engineering Command, Environmental Engineer, at 532-2450.

Sincerely,

K. S. WEBSTER
Acting
