Subj: REMEDIAL INVESTIGATION/FEASIBILITY STUDY FOR NAVAL STATION
TREASURE ISLAND, SAN FRANCISCO

Encl: (1) Summary Report On Investigation Derived Waste Management (IDW)
ltr of 10, February 1993

1. Enclosure (1) is provided for your information. This summary report details how the IDW was evaluated, classified, and disposed of. Presently, two-thirds of the solid IDW was sent to Class I disposal site. This means was the most cost effective proposal for disposal.
2. Remaining one-third of the solid IDW will be disposed of pending review of the laboratory analytical results for the resampled samples. The Navy will update enclosure (1) upon classification of the remaining IDW.
3. Laboratory analytical results indicated that water IDW met the required minimum levels for disposal at the Naval Station Treasure Island treatment facility. Therefore, wastewater was disposed of at the treatment facility with authorization from the plant manager.
4. Thank you for your guidance and involvement in this project. For further information, please contact Mr. Ernesto M. Galang, Code 1813EG, at (415) 244-2560.
