**DRAFT ADDITIONAL CHARACTERIZATION WORK PLAN FOR SITE
24, NAVAL STATION TREASURE ISLAND (MAY 16, 1997)**

Dear Mr. Galang:

The Department of Toxic Substances Control, in conjunction with the San Francisco Bay Regional Water Quality Control Board, has reviewed the Draft Additional Characterization Work Plan for Site 24 at Naval Station Treasure Island. Our primary concern is that, prior to embarking on further development of the work plan and beginning the proposed sampling, the Navy should conduct thorough reconnaissance of Building 99 to ensure that the proposed approach is adequate. The Navy should consider including contingencies for the presence of more than one drain or drain system, for example.

If you have any questions regarding this letter, please contact me at (510) 540-3769.

Sincerely,

Mary Rose Cassa, R.G.
Engineering Geologist
