NAVAL STATION, TREASURE ISLAND**

OCTOBER 1997

1. PROGRESS DURING THIS PERIOD

Continued the preparation of corrective action plan (CAP) for petroleum sites.

Continued the data validation activities for the offshore sediment sampling data.

Initiated the Site 12 additional characterization field work.

Initiated the YBI Sites validation studies work plan for ecological risk assessment.

Initiated the preparation of responses to RAB comments on the draft RI report and the RI report addenda.

2. MEETINGS AND REPORTS DURING THIS PERIOD

Meetings:

October 07, 1997 - RPM/BCT Meeting

October 21, 1997 - Restoration Advisory Board (RAB) Meeting

Reports:

Monthly Progress Report/Meeting Minutes

Draft Site 24 Additional Characterization Summary Report

3. PROBLEMS ENCOUNTERED AND RESOLUTIONS

In Addendum 3 to the draft RI report, the Navy and its contractor developed petroleum screening levels of 250 and 14.3 ppm for soil and groundwater, respectively. The RWQCB has not concurred with the screening levels and would prefer the concentrations to be about one order of magnitude lower. The Navy and its contractor met with the RWQCB in May 1997 to resolve how the calculations were performed and identify alternative methods to evaluate the data. However, no conclusions were reached. At the 2 June 1997 RPM/BCT meeting, the Navy and its contractor restated the resolution of the screening levels in order to complete the corrective action plan (CAP), and would still use the scientifically developed screening levels. The RWQCB suggested that the Navy also considers lower screening levels for use in the CAP.
