**Date:** Monday, November 30, 2015 11:19:26

---

Marc-I have reviewed the above-referenced report. I have no comments. I need to make a note though that TCE MCLs have been used as a clean-up goal. The work plan was previously approved with MCLs as a cleanup goal. DTSC used Tap water RSLs to evaluate the associated risk from TCE concentrations in the wells. Based on the calculations, the associated risk is within the risk management range. I, therefore, do not have any further comments. If you have any questions or comments, please do not hesitate to call me. Thanks

Subject: :::COMMENTS DUE:::DRAFT SITE INSPECTION REPORT, NEIGHBORHOOD E GROUNDWATER, MCAS TUSTIN

All,

The Draft Site Inspection (SI) Report for Neighborhood E Groundwater at MCAS Tustin was submitted to the regulatory agencies on 23 September 2015 for review. The Navy's cover letter requested that comments, if any, be submitted by Wednesday, 11 November 2015. The Navy has not received letters and/or e-mails to date from any of the regulatory agencies for the referenced document. Please complete your review of the document and provide a comment or concurrence letter to the Navy. If an extension of the review time of several weeks is required, please give me or Content a call to discuss.

Thanks,

Marc P. Smits PE
