RE: Final Record of Decision, Site 57 – Building 292 TCE Contamination, Naval Support Facility Indian Head, September 2007

Dear Mr. Jorgensen:

The Federal Facilities Division (FFD) of the Maryland Department of the Environment's Hazardous Waste Program has completed its review of the above referenced document. This Record of Decision documents the Navy's final remedial action at Site 57 – Building 292 TCE Contamination, which is located within the restricted area of Naval Support Facility Indian Head. This final remedial action will include in-situ bioremediation, natural attenuation, land use controls and monitoring. The final remedy selection is based upon a Remedial Investigation of Site 57, which indicated that this action is necessary to ensure protection of human health and the environment at this site. The remedy selected by the Navy is in compliance with the Comprehensive Environmental Response, Compensation and Liability Act.

A public meeting was held on February 2, 2007 to present the findings in the Proposed Plan. The comments received during the public meeting and during the public comment period did not require a revision to the proposed remedy. Based upon the acceptable level of protection to human health and the environment provided by the remedy, the FFD concurs with the Navy's selected remedy for Site 57.

If you have any questions, please contact me at (410) 537-3791.

Sincerely,

Curtis DeTore  
Section Head  
Federal Facilities Division
